## Go Newsletter

Issue 71 — August 13, 2015

### FEATURED

#### Performance Without The Event Loop

A look at how Go helps programmers write highly scalable network servers, without having to worry about thread management or blocking I/O.

*DAVE CHENEY*

#### Dropbox Uses Go For Its Entire Infrastructure Service Layer

Basically just a string of tweets from a Dropbox engineer showing how much Dropbox uses Go (“10s of thousands of servers running millions of hits per second.”) before encouraging people to go work there.

*JAMIE TURNER*

#### Get more from Redis: Autoscaling, Support and Analytics from RedisGreen

Thousands of apps use RedisGreen for data hosting and performance analysis. Get insights quickly with our analytics dashboard. Start today without a credit card.

REDISGREEN **SPONSORED**

#### Using the gdb Debugger with Go

The gdb debugger allows you to inspect your compiled binaries, get backtraces on the fly, skip code, add breakpoints, and more.

*BRENDAN FOSBERRY*

#### Gockerize: Packages Static Golang Binaries Into Docker Containers

A tool to automate building statically linked binaries and packaging them into minimal Docker containers.

*AEROFS*

#### kala: A Modern Job Scheduler Written in Go **CODE**

Has a simple language agnostic JSON over HTTP API and uses BoltDB as a backend. Currently just an alpha.

*AJ BAHNKEN*

#### accounting: Money and Currency Formatting for Go **CODE**

Supports different levels of precision, numeric separators, formats, type conversion.

*KYOUNG-CHAN LEE*

### JOBS

#### Apply to top SF NYC startups in 60 seconds

Want to spend less time job searching? Sign up to Underdog.io and startup founders hiring managers will email you directly. You decide where to interview and where to work. Your information is kept private from current past employers.
