FEATURED

[curl-to-Go: Convert curl Commands to Go Code](#) **TOOLS**

This online tool takes 'curl' commands, as you might use at the terminal, and converts them to the equivalent Go code, even down to creating a struct for JSON payloads and handling file uploads.

MATTHOLT

[Visualizing Concurrency in Go](#)

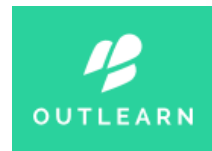

A fascinating, animated look at visualizing the mechanics of parallelism and concurrency in Go apps.

IVAN DANILUK

[Mastering Concurrency in Go](#)

Guided path through the best resources on concurrency, assembled by an expert curator. Get the most out of modern multi-core processors using only channels and idiomatic Go.

OUTLEARN **SPONSORED**

[Go 1.6 Release Candidate 1 Released](#) **NEWS**

The final release of 1.6 is expected in a couple of weeks.

CHRIS BROADFOOT

[WolfenGo: A Wolfenstein 3D Clone in Go](#)

What's a language without a Wolfenstein 3D clone/port? Here's one for Go, and a look at some issue encountered during the effort.

GIUSEPPE DM

[Goad: Go + AWS Lambda-Powered, Distributed Load Testing Tool](#) **TOOLS**

Goad allows you to load test your sites from all over the world while costing you fractions of a penny by using AWS Lambda in multiple regions simultaneously.
